WORK EXPERIENCE

Software Development Engineer

July 2022 — Present

Jio Platforms Limited

Full Time - Mumbai, India

- Built the end-to-end **Online Self-KYC** SIM-activation journey (OTP, live photo/video capture, address, plan & payment) with **React.js**, **Next.js**, **JavaScript** and **REST APIs** in an **Agile** setup — driving **350K+** daily page hits and **8,000+** daily SIM activations.
- Improved responsiveness of the high-traffic, multi-step form by applying **memoization** to cut unnecessary re-renders by **40%**, and hardened reliability with **memory profiling**, **session management**, and **rate limiting** under peak load.
- Architected and delivered single- and multi-page web applications using **React**, **Redux**, **Next.js** with **server-side rendering** and client-side rendering strategies, adopting a **Micro Frontend** architecture; improved time-to-interactive by **30%** and Core Web Vitals through **React Profiler** analysis and SEO optimization.
- Executed a full migration of the Credit Score journey in JioFinance App from React web to **React Native** for mobile, supporting **2,000+** daily unique users and reducing crash rate by **20%**.
- Drove scalability of the **Jio Business Cloud** dashboard, building interactive data visualizations with **D3.js** and **Chart.js** and leveraging **React Query** caching with **GraphQL/REST APIs** to reduce network calls by **40%** and improve page load time.
- Authored **IDTO**, a single-page progressive web app for quizzes, enabling **800+** participants to compete using **WebSocket** for instant question delivery and level-based winner roll-out.
- Ensured Sonar compliance with **ESLint** enforcement, achieved **90% test coverage** using Jest and React Testing Library, and streamlined releases through **CI/CD pipelines**.

Full Stack Developer Intern

July 2021 — July 2022

Dquip CRM

Mumbai, India

- Engineered a no-code Form Builder for the Laravel-based IMEX CRM, enabling users to publish interactive forms directly onto websites and reducing form-creation time by **80%**.
- Designed a highly configurable field engine supporting **6** adaptive field size options and **11** dynamic input types, enhancing flexibility and user customization.
- Implemented **JWT**-based authentication and role-based authorization to secure CRM modules and REST APIs, enforcing granular access control across user roles.
- Adopted **Test Driven Development (TDD)**, writing unit tests ahead of implementation to ship reliable, regression-resistant CRM modules.
- Developed scalable CRM modules for the Flipkart integration using **MVC** architecture and OOP, backed by optimized **MySQL** schemas and indexed queries that sped up record retrieval on large datasets.
- Diagnosed and resolved **50+ production issues** on Debian and CentOS servers running **Nginx**, enhancing platform stability and reducing downtime by **30%**.

Web Developer Intern

June 2021 — July 2021

Sahu Technologies

Mumbai, India

- Crafted 4 responsive client-facing web pages using HTML5, CSS3, and JavaScript with the **BEM** convention for maintainable, scalable styles, improving Largest Contentful Paint (LCP) by **20%** through image optimization and code minification.
- Applied **UI/UX** principles — visual hierarchy, intuitive navigation, accessibility — to build **10+** reusable components at a **95+** Lighthouse accessibility score.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+) TypeScript Python PHP C/C++ MySQL
Libraries & Frameworks:	ReactJS React Native NextJS Redux Zustand redux-thunk Flux React Query GraphQL Context API Node.js Express jQuery Axios Laravel
Styling & UI:	Tailwind CSS Bootstrap Material UI ANT Design Responsive Design Mobile-first design Accessibility (WCAG)
AI / LLMs:	LLM API Integration (Claude) MCP
Tools & DevOps:	Webpack Babel ESLint Sonar React Profiler APISIX Figma Photoshop Lightroom Git Nginx CI/CD Azure DevOps AWS GCP JIRA
Security & Auth:	OAuth 2.0 / OIDC JWT Session Management OWASP Basics
Concepts:	Micro Frontends SSR/CSR REST OOP Agile/Scrum Data Structures & Algorithms DBMS Web Vitals
Performance:	Lazy Loading Code Splitting Memoization Bundle Size Analysis SSR/SSG (Next.js) Middleware
Testing:	Jest React Testing Library Enzyme Cypress (E2E) TDD

EDUCATION

B.E in Computer Science

Aug 2018 — June 2022

Bharati Vidyapeeth College of Engineering (GPA: 9.21/10)

Mumbai, India

ACHIEVEMENTS

- Jio Star Performer (Innovation Champion)
